PRAISE FOR THE PREVIOUS EDITIONS:

“Clearly conceived, written with verve and moral commitment, it should be welcomed by student readers.”

—*WORLD HISTORY BULLETIN*

“McWilliams and Piotrowski provide a thoughtful and integrated appreciation of a huge topic and have produced a book that deserves a wide readership.”

—*AUSTRALIA AND WORLD AFFAIRS*

“Exceedingly effective... [The authors provide] a coherent summary of international history during the Cold War and beyond.” —*JOURNAL OF WORLD HISTORY*

Thoroughly updated throughout, this new edition of *The World Since 1945* traces the major political, economic, and ideological patterns that have evolved in the global arena from the end of World War II to the present day.

The book provides not only the background that students need in order to understand contemporary international relations, but also new material about politics around the world. Among the current issues covered in this edition are the impact of the ongoing global recession, China's growing role in the world economy, the unchecked nuclear arms race, NATO's eastward expansion, the wars in Afghanistan and Iraq, and the escalation of the Israeli-Palestinian conflict.

Beautifully written and student friendly, *The World Since 1945* has made its place as the text of choice in scores of introductory IR and world history courses.

Wayne C. McWilliams and **Harry Piotrowski** are emeritus professors in the Department of History at Towson University.

The World Since 1945: A History of International Relations

Wayne C. McWilliams and Harry Piotrowski

PRAISE FOR THE PREVIOUS EDITIONS:

“*Introducing Global Issues* is a valuable resource. Since I began assigning it, my students have been much more involved in the course.”
—JEFFREY P. BLICK

“A balanced, in-depth introduction to the intertwined nature of modern global issues.”
—RALPH G. CARTER

Issues ranging from conflict and security, to the economy and economic development, to the environment are explored in this fully revised and updated edition of *Introducing Global Issues*.

Increased attention is given in the new edition to the historical conditions that have exacerbated the gap between North and South. Also notable are discussions of international efforts to deal with such challenges as terrorism, human rights violations, the threat of nuclear proliferation, global warming, and the seemingly intractable Israel-Palestine conflict.

The material has been successfully designed for readers with little or no prior knowledge of the topics covered. Each chapter provides an analytical overview of the issues addressed, identifies the central actors and perspectives, and outlines past progress and future prospects. Discussion questions are posed to enhance students' appreciation of the complexities involved, and suggestions for further reading additionally enrich the text.

Introducing Global Issues

Michael T. Snarr and D. Neil Snarr, editors

“This is a terrific book, one that will provoke and engage students and practitioners alike. It deserves to be widely read.”

—FEN OSLER HAMPSON

Now that the clear delineations of the Cold War era are behind us, what are the contours of the international system? And what does the new reality mean for the United States, the acknowledged hegemon? Provocatively applying IR theory to the world of policy analysis, *Imbalance of Power* showcases current policy debates about the nature of both the international order and the role of the US within it.

The authors bring to life concepts of realism, hegemony, liberalism, and constructivism, making it clear why these ideas are so relevant to understanding the challenges of world politics today. In the process, they address thorny issues of structure vs. policy, context vs. content, even determinism vs. choice—shedding light on the shape of a seemingly amorphous system.

The Nation-State and Global Order: A Historical Introduction to Contemporary Politics

Walter C. Opello, Jr., and Stephen J. Rosow

“The authors treat us, and our students, to a well-conceptualized and compelling array of historical vignettes in the evolution of the ‘state.’... They provide a valuable tool for teaching the [state’s] long and complex history.”

—RODNEY BRUCE HALL, INTERNATIONAL STUDIES REVIEW

This engaging introduction to contemporary politics examines the historical construction of the modern territorial state.

Studies of state formation in Congo, England, France, Germany, Iraq, Japan, Nigeria, Russia, Turkey, and the US enrich the discussion, which ranges from ancient Rome to the present.

Walter C. Opello, Jr., and Stephen J. Rosow are professors of political science at SUNY, Oswego.

5th Edition Global Politics in the Human Interest

Mel Gurtov

“A much-needed alternative to the usual treatment of world politics.”

—INTERNATIONAL JOURNAL OF COMPARATIVE SOCIOLOGY

“Mel Gurtov’s enormous contribution is to provide an alternative to the misplaced faith in global markets and the nation-state system as the best means to provide for human needs and genuine security.” —PAUL JOSEPH

Traditional studies of world politics emphasize the struggle between states as they search for national security. But increasing interdependence has transformed the world political agenda, creating the need for new tools to explain the changing reality of global politics. *Global Politics in the Human Interest* provides those tools.

Mel Gurtov is professor of political science and international studies at Portland State University.

Making Sense of International Relations Theory

Jennifer Sterling-Folker, editor

“[A] masterful discussion and application of the major theoretical approaches in international relations.”

—STEVEN E. LOBELL, INTERNATIONAL STUDIES REVIEW

“A highly inventive textbook that showcases leading theoretical approaches to IR.... Will help students of IR to see the value of theory and to appreciate the very significant differences among and within these approaches.”

—AMY E. ECKERT, MILLENNIUM

What does it mean to adopt a realist, or a world systems, or a feminist approach to international relations? Does the plethora of “isms” have any relevance to the real world of global politics and policymaking? *Making Sense of IR Theory* addresses these questions by illustrating theories in action.

With the case of Kosovo as a common point of reference, each contributor presents a particular framework for interpreting world affairs. This structure offers students tangible examples of the use of varying theories, while illuminating the explanatory differences among them. Incorporating extensive introductory sections, the book is uniquely designed to explore alternative ways of understanding current events to assist students in making sense of, as well as with, IR theory.

Jennifer Sterling-Folker is associate professor of political science at the University of Connecticut.

“A thoughtful pedagogical tool through which students can become actively involved in the tough decisions and dilemmas that policymakers face today.”

—TIMOTHY D. SISK

“*International Relations in Action* stands out as a successful example of stimulating student curiosity through active learning. I would highly recommend it for any course on international relations.”

—WILLIAM MUCK

This hands-on exercise allows students to relate the concepts and issues at the foundation of global politics to the realities of international politics today.

As influential leaders in the fictional world of *Politica*, each team of students governs a country with a unique history, geography, and culture. The teams must use strategy and negotiation to succeed—and survive—seeking to achieve specific territorial, security, and economic objectives. In the process, they grapple with a range of complex challenges: energy security, ethnic conflict, humanitarian intervention, environmental disaster, terrorism, nuclear proliferation, and more. Students also pursue individual objectives based on the governmental post they hold—and quickly learn that self-interest and national interest are not always compatible.

Teams are judged on their effectiveness in meeting stated objectives, but must also relate their practical experience to the academic content of the course. Toward this end, the book provides summaries, analysis, study questions, and additional sources of information for each of the theories and issues encountered during the simulation. Guidelines for instructors are also included.

International Relations in Action has been tested in multiple courses of various sizes, with students and instructors unanimously agreeing that it makes abstract theories practical and accessible, evokes an appreciation for the complexity of international politics, and

generates enthusiasm for the study of international relations. In the representative words of one student, “It was the best learning experience I’ve ever had.”

Brock F. Tessman is assistant professor of international affairs at the University of Georgia’s School of Public and International Affairs.

—R.S. ZAHARNA

“Witty and wise and with a sobering dose of warning, Daryl Copeland has penned a masterly manual for navigating the diplomatic rapids of the twenty-first century.”

—NICOLAS J. CULL

“Provocative, thoughtful, and cutting edge.... Copeland is an accomplished diplomat who writes from an academic perspective, which is useful and rare.... His assessment of diplomacy’s shifting center of gravity is a compelling read.”

—BRUCE GREGORY

Daryl Copeland charts the course for a new kind of diplomacy, one in tune with the demands of today’s interconnected, technology driven world.

Eschewing platitudes and broadly rethinking issues of security and development, Copeland provides the tools needed to frame and manage issues ranging from climate change to pandemic disease to asymmetrical conflict and weapons of mass destruction. The essential keystone of his approach is the modern diplomat, able to nimbly engage with a plethora of new international actors and happier mixing with the population than mingling with colleagues inside embassy walls.

Through the lens of *Guerrilla Diplomacy*, Copeland offers both a call to action and an alternative approach to understanding contemporary international relations.

Daryl Copeland is senior adviser for strategic policy and planning in the Canadian Department of Foreign Affairs and International Trade.

The Dynamics of Diplomacy

Jean-Robert Leguey-Feilleux

“An excellent book, comprehensive and thorough, that incorporates the changes of the past 30 years in the evolution of diplomatic practice. This is essential reading for both professionals and academics.”

—JOHN D. STEMPEL

This comprehensive new text offers a fresh, up-to-date look at the evolution, politics, and practice of diplomacy today.

Leguey-Feilleux first provides a solid grounding in the history of traditional diplomacy, beginning with ancient times. He then reviews the forces of contemporary change—the dramatic developments in both international politics and the realm of technology that have affected the practice of diplomacy—and explores the full range of diplomatic modes. How much of traditional diplomacy remains relevant today, he helps us to assess. How much of it is being drastically changed, and how do those changes affect both the profession and the conduct of foreign relations?

Designed to be both authoritative and engaging, and with abundant in-depth case studies, *The Dynamics of Diplomacy* will provide readers with a thorough understanding of all that contemporary diplomacy entails.

Jean-Robert Leguey-Feilleux is professor of political science at Saint Louis University.

“Accessible and challenging.... The mix of theoretical and empirical essays offers an advantage over similar books.... No single book can be exhaustive ... but this one offers readers a sample of works from many major authors and on most of the important topics in the field.”

—BRADLEY H. KARNAFEL, *SOUTHEASTERN POLITICAL REVIEW*

Introducing the classic and contemporary ideologies of international political economy—and especially the ways that affect the behavior of states and markets—this anthology has been carefully constructed for classroom use.

Articles representing contending views of IPE are followed by selections on the international monetary system, development assistance, and international trade. With the student reader in mind, each piece is prefaced with an editors' note placing it in context. This new edition thoroughly engages with the past decade of changes in the global political economy.

International Political Economy: State-Market Relations in a Changing Global Order

*C. Roe Goddard,
Patrick Cronin, and
Kishore C. Dash, editors*

“Clear, interesting, and insightful.... This excellent contribution to the WTO literature will be invaluable for international political economy classes.”

—SUSAN SELL

A comprehensive examination of the World Trade Organization, this new book covers all the basics: the WTO's history, its structure, and its practices and concerns.

Beginning with an overview of the world trading system since the end of World War II, Lanoszka explains the profound changes brought about by the establishment of the WTO. Then, a discussion of the organization's structure, rules, membership criteria, and decisionmaking processes provides the foundation for an exploration of key issues—e.g., agreements dealing with agricultural products, textiles, and dumping—that continue to be sources of international tension.

The rapidly growing global service economy is the topic of an entire chapter, as is the passionately debated subject of intellectual property rights. Emerging issues such as the environment, e-commerce, and the new roles of the developing countries also receive thorough attention.

The book concludes with a look at the most recent developments taking place in the WTO and, more broadly, in the world trade system.

Anna Lanoszka is associate professor of international economic relations at the University of Windsor, Canada.

“An essential guide for anyone interested in getting an up-to-date briefing on the origins and state of play in the burgeoning China–Latin America relationship.”

—KEVIN P. GALLAGHER

With China on the minds of many in Latin America—from politicians and union leaders to people on the street, from business students to senior bankers—a number of important questions arise. Why, for example, is China so rapidly expanding its ties with the region? What is the nature of the new connection, and how will it affect institutions, economic structures, politics, and society? R. Evan Ellis provides a comprehensive look at the character and impact of the developing PRC–Latin America relationship.

Ellis examines how the relationship has taken on distinct characteristics in various subregions, considering the role of supplier-and-market countries such as Argentina and Brazil, China’s cautious dance with populism as it seeks access to Andean oil, and the dominance of the Taiwan issue in China’s dealings with Central America and the Caribbean. He also addresses the unique case of Cuba. Not least, his work sheds light on the implications of the China–Latin America relationship

for conventional wisdom regarding globalization, development, and the links between economics and politics.

R. Evan Ellis is professor at the Center for Hemispheric Defense Studies, where he focuses on Chinese initiatives in Latin America, populism in the Andes, and other Latin American security issues.

China in Latin America: The Whats and Wherefores

“A very well-written text that merits significant accolades for its comprehensive analysis of how corporate power becomes embedded into the social and political fabric of the known world today.”

—PHOEBE MOORE, *INTERNATIONAL STUDIES REVIEW*

“A wonderfully comprehensive and readable overview of business power in global governance. Full of insights and information, it will be an excellent resource for those just starting to learn about the topic, as well as those who already have expertise in this area.”

—TONY PORTER

Has the political power of big business, particularly transnational corporations (TNCs), increased in our globalizing world? What, if anything, constrains TNCs? Analyzing the role of business in the global arena, this systematic and theoretically grounded book addresses these questions.

Fuchs considers the implications of expanded lobbying efforts by businesses and business associations, the impact of capital mobility, and developments in the area of self-regulation and public-private partnerships. She also highlights the role of business in framing policy issues and influencing public debate. Clearly identifying the sources of the marked increase in the political power of TNCs, she also provides ample evidence of the limitations and vulnerabilities that rein them in.

Doris Fuchs is professor of political science at the University of Münster.

Getting Globalization Right: The Dilemmas of Inequality

Joseph S. Tulchin and Gary Bland, editors

“A welcome addition.... The contributors persuasively demonstrate that countries have considerable latitude in addressing inequality even as they participate in the global economy.”

—MVUSELELO NGCOYA,
INTERNATIONAL STUDIES REVIEW

Getting Globalization Right explores political and economic changes in seven new democracies that have in common both a movement toward greater integration with the world economy and the challenges posed by persistent or even increasing domestic economic inequalities.

The authors argue that, without effective national policies to dampen the effects of globalization, the short-term impact of opening the economy has a negative effect on levels of poverty and inequality. In a more positive vein, however, and without minimizing the difficulties involved, they identify the types of social policies that can blunt or counter these negative effects. They also suggest that international governance will have a growing influence on how globalization affects individual nations.

Joseph S. Tulchin is former director of the Latin American Program at the Woodrow Wilson International Center for Scholars. **Gary Bland** is senior public policy and governance specialist at the Research Triangle Institute.

—SIMON SPRINGER,
JOURNAL OF PEACE RESEARCH

“This is an exciting, thoughtful, and extremely well written book.... Rapley's penetrating analysis of the multiple global forces producing both marginalization and resistance is a must read.”

—RANDOLPH B. PERSAUD

Has the far-reaching experiment in creating a new world order along neoliberal lines succeeded? John Rapley answers with an emphatic no, contending that the rosy picture painted by neoliberal proponents of globalization was based on false assumptions.

True, Rapley acknowledges, neoliberal reforms often did generate economic growth—but at a price. The resulting increase in inequality led to political instability and spawned tendencies ranging from right-wing populism to renewed ethnic and Islamic militancy.

Rapley offers a range of cases to illustrate how neoliberal globalization has helped to destroy regimes in the developing world by profoundly altering patterns of income distribution and resource allocation. The political tensions unleashed by these regime crises, he argues, are now being manifested around the globe, with the negative consequences still to be fully realized.

3rd Edition Understanding Development: Theory and Practice in the Third World

John Rapley

“Emphasizing a close link between development theory and the actual practice of economic policymaking, Rapley grounds the discussion in a way that will be much appreciated by both students and their instructors.... [He] writes with a rare clarity.”

—BRUCE E. MOON,
AMERICAN POLITICAL SCIENCE REVIEW

“Concise, yet all encompassing and meticulously referenced.... Rapley's study is determined to unravel the intricacies of development practice across the third world and map out its intellectual roots. The project certainly succeeds in these goals.”

—FIROOZA PAVRI,
PROGRESS IN DEVELOPMENT STUDIES

This accessible text provides both an assessment of the current state of development theory and an extensive survey of the impact of evolving policies and practices throughout the developing world.

Using a wide range of examples, Rapley shows where and how various approaches to development have worked—or failed—confronting the question of why development remains so far out of reach for so many poor countries.

John Rapley is senior lecturer in the Department of Government at the University of the West Indies, Mona.

PRAISE FOR THE PREVIOUS EDITIONS:

“One of the most comprehensive volumes yet produced on the causes of income inequality between and within countries.... A must for anyone wishing to better understand the elusive concepts of development and underdevelopment.”

—GARETH ELLIOT, *SOUTH AFRICAN JOURNAL OF INTERNATIONAL AFFAIRS*

“The selection of materials is excellent, and the brief introductions to each selection are deft and informative. Impressively, space has also been found for critiques of the most important positions.”

—*JOURNAL OF DEVELOPING AREAS*

This new edition of *Development and Underdevelopment* retains the strongest contributions of the previous three editions, but includes 12 new chapters that reflect the many seminal contributions made to the field in recent years. There are also two new sections: one addressing the historical origins of the gap between rich and poor countries, and one focusing on how globalization has affected the gap between countries and between the rich and poor within countries.

4TH EDITION

Development and Underdevelopment: The Political Economy of Global Inequality

Mitchell A. Seligson and John T Passé-Smith, editors

“An excellent overview of an increasingly important set of issues. Recently, there has been a fruitful reintegration and cross-fertilization of security studies and political economy. What has been lacking is a single book to review the results. This is that book.... Highly recommended.”

—CHOICE

Reflecting the growing interest among scholars and practitioners in the relationship between security affairs and economics, this new volume explores the nature of that relationship in the first decade of the 21st century.

Among the issues addressed in the book are the impact of the events of September 11 and of the US response. The authors also consider whether the challenges of the current security environment are in fact new, or instead more virulent manifestations of long-term trends and processes. The result is a state-of-the-art resource on the engagement between security studies and international political economy, intended to encourage still further broadening and overlap of the research agendas of both fields.

International Law and Politics: Key Documents

Shirley V. Scott, editor

“Writing an easily accessible but still comprehensive text on the role of international law in current world politics is not easy, yet it is exactly what Shirley Scott has accomplished with this excellent introductory book.”

—HANNE HAGTVEDT VIK, *JOURNAL OF PEACE RESEARCH*

“This is an excellent introductory book and should be appropriate for a wide range of survey/introductory courses in international law.”

—JOHN KING GAMBLE, *AUSTRALIAN YEARBOOK OF INTERNATIONAL LAW*

“This is an excellent primer for International Relations courses, and all potential readers interested in the interplay of law and politics.... [Provides] succinct and authoritative coverage of the ties between contemporary world events and the norms that supposedly govern them.”

—UN21 NEWSLETTER

“A thoroughly well researched and supported volume ... this is a superb treatment of the subject matter.” —CHOICE

International Law in World Politics introduces the concepts, the rules, and the functioning of international law in a way that is accessible to students of political science.

Scott covers such core topics as the nature of legal argument, the negotiation and implementation of multilateral treaties, and the place of the United Nations, other intergovernmental organizations, and nonstate actors in the international legal system. Equally important, she connects the actual content of laws dealing with, for example, human rights, the use of force, the environment, and genocide to current issues and problems. Case studies within the chapters bring the real world of world politics to life.

Covering the full range of this essential subfield of IR, this new text effectively explains the role that international law plays in the changing arena of world politics.

“An extraordinary primer for any student of international relations.... This book collates and masterfully illustrates the varied processes that drive contemporary international organization.”

—UN21 NEWSLETTER

“Putting the pieces of the puzzle together in a highly readable way, Karns and Mingst provide a comprehensive overview of the many actors, processes, and challenges involved in the complex subject of global governance.”

—ANNE-MARIE SLAUGHTER

This long-awaited introduction to international organizations covers the entire breadth of the subject in a way that will be welcomed by students and teachers alike.

Professors Karns and Mingst trace the evolving roles both of IGOs, NGOs, states, and nonstate actors and of norms, rules, and other pieces of global governance. While they give extensive attention to the UN system, the full range of regional and subregional organizations is also thoroughly covered, as are the activities and influence of a variety of nonstate actors.

Each of four issue-based chapters—on peace and security, economic development, human rights, and the environment—presents a contemporary case study and then examines the issues and the pieces of global and regional governance that are involved. Throughout, the authors highlight questions of the legitimacy, accountability, and effectiveness of global governance.

The UN Security Council: From the Cold War to the 21st Century

David M. Malone, editor

“A richly informative volume on the evolving role of the Council.” —CHADWICK ALGER, INTERNATIONAL STUDIES REVIEW

“[A] well-planned and fascinating book.... well worth reading.” —SALLY MORPHET, INTERNATIONAL AFFAIRS

The nature and scope of UN Security Council decisions—significantly changed in the post-Cold War era—have enormous implications for the conduct of foreign policy. *The UN Security Council* offers a comprehensive view of the council both internally and as a key player in world politics.

Focusing on the evolution of the council's treatment of key issues, the authors discuss new concerns that must be accommodated in the decisionmaking process, the challenges of enforcement, and shifting personal and institutional factors. Case studies complement the rich thematic chapters. The book sheds much-needed light on the central events and trends of the past decade and their critical importance for the future role of the council and the UN in the sphere of international security.

The UN Secretariat: A Brief History

Thant Myint-U and Amy Scott

“A concise, cogent and realistic account.... [It] should also help to dispel some widely accepted misconceptions of this complex and sometimes controversial subject.”

—SIR BRIAN URQUHART

Reform of the UN Secretariat has been a subject of debate for nearly as long as the UN has existed. Providing much-needed background for more informed discussions of the subject, this new book provides a concise history of the Secretariat—a little understood, but critically important part of the UN system.

Thant Myint-U has served at the UN in three peacekeeping operations, in the Office for the Coordination of Humanitarian Affairs and the Department of Political Affairs, and on the research staff of the Secretary-General's High-Level Panel on Threats, Challenges and Change (HLPOTCC). Amy Scott, an associate at the International Peace Institute, previously served in the Office of the Special Adviser to the Secretary-General on follow-up to HLPOTCC.

“Students will undoubtedly find it provocative, and will also appreciate the useful primers on the organizations it assesses.”

—STEVEN BERNSTEIN, POLITICAL SCIENCE QUARTERLY

“Ambitious and thought-provoking.... Zweifel explores the emergence and practice of transnational democracy across a range of global, regional, and functional organizations.”

—EDWARD LUCK

Do international organizations represent the interests of the global citizenry? Or are they merely vehicles for the agendas of powerful nations and special interests? Thomas Zweifel explores this increasingly contentious issue, deftly blending history, theory, and case studies.

Thomas D. Zweifel, CEO of the Swiss Consulting Group, is also adjunct professor at Columbia University's School of International and Public Affairs.

International Organizations and Democracy: Accountability, Politics, and Power

Thomas D. Zweifel

How does the United Nations actually work? How does it reconcile the diverse interests of 191 sovereign member states plus those of the multinational corporations that lobby it, the numerous NGOs with which it interacts, and the enormous international secretariat that services it in the search for effective solutions to the myriad problems it confronts daily? *Politics and Process at the United Nations* answers these questions, providing a vivid picture of the dynamic interaction between actors and institutional structures.

Rarely, if ever before, have inside expertise and outside analysis of peacekeeping been so well combined.”

—MICHAEL DOYLE

Unique in its breadth of coverage, the *Annual Review of Global Peace Operations* presents the most detailed collection of data on peace operations—those launched by the UN, by regional organizations, by coalitions, and by individual nations—that is available. Features of the 2009 volume include:

- a discussion of the complex nature of contemporary peace operations and their strategic aims
- a summary analysis of trends and developments in peace operations through 2008
- concise analyses of all peacekeeping missions on the ground in 2008
- in-depth explorations of key missions, focusing on those that faced significant challenges or underwent major developments

- special attention to the cluster of interrelated conflicts and peace operations across the Horn of Africa
- extensive, full-color maps, figures, and photographs

The editorially independent *Review* is a project of the **Center on International Cooperation** at New York University, with the support of the Peacekeeping Best Practices Section of the UN's Department of Peacekeeping Operations.

There is increasing consensus among scholars and policy analysts that successful peacebuilding can occur only in the context of capable state institutions. But how can legitimate and sustainable states best be established in the aftermath of civil wars? And what role should international actors play in supporting the vital process?

Addressing these questions, this state-of-the-art volume explores the core challenges involved in institutionalizing postconflict states. The combination of thematic chapters and in-depth case studies covers the full range of the most vexing and diverse problems confronting domestic and international actors seeking to build states while building peace.

Charles T. Call is assistant professor of international relations at American University. **Vanessa Wyeth** is on the staff of the International Peace Institute, where she focuses on issues of statebuilding and peacebuilding.

A TEACHING RESOURCE

NEW—7TH EDITION!

Peace, Justice, and Security Studies: A Curriculum Guide

Timothy A. McElwee, B. Welling Hall,
Joseph Liechty, and Julie Garber, editors

PRAISE FOR THE PREVIOUS EDITIONS:

“Packed with information for establishing an impressive range of courses.” —PACIFIC RESEARCH

“Provides unsurpassed resources for teachers.... Anyone planning a new course or reviving an old one would be wise to start here.... Regardless of the approach one chooses in teaching peace studies, the syllabi provide starting points for virtually any topic a student may want to research. I imagine my copy getting worn, stained, and dog-eared in fairly short order and remaining in active use long after.”

—PEACE & CHANGE

Fully revised to reflect the realities of the post-September 11 world, this acclaimed curricular reference provides a comprehensive review of the field of peace, justice, and security studies. Seven introductory essays systematically cover the state of the discipline today, surveying current intellectual and pedagogical themes. These are followed by seventy classroom-tested syllabuses organized by topics and including course descriptions, schedules, bibliographies, and notes on successful teaching practices. In keeping with the multifaceted nature of the subject, multiple perspectives, among them political science, philosophy, religious studies, sociology, and anthropology, are fully represented in this indispensable resource.

Timothy A. McElwee is Plowshares Associate Professor of Peace Studies and director of the Peace Studies Institute at Manchester College. **B. Welling Hall** is professor of politics and international studies and Plowshares Professor of Peace Studies at Earlham College. **Joseph Liechty** is associate professor of peace, justice, and conflict studies at Goshen College.

Julie Garber is editor of Plowshares publications for Earlham, Goshen, and Manchester Colleges.

“Fiscal policy is critical to sustaining peace, as well as development. *Peace and the Public Purse* covers this vital issue comprehensively, insightfully, and realistically. It is essential reading for anyone working on postconflict societies.”

—FRANCES STEWART

“Too often policymakers neglect the economic dimensions of postconflict peacebuilding. This thoughtful and timely book shows why that is a serious mistake and what can and should be done about it.”

—GARETH EVANS

In the aftermath of violent conflict, how do the economic challenges of state-building intersect with the political challenges of peacebuilding? How can the international community help lay the fiscal foundations for a sustainable state and a durable peace? *Peace and the Public Purse* examines these questions, lifting the curtain that often has separated economic policy from peace implementation.

Drawing on recent experiences in Afghanistan, Bosnia, Cambodia, Timor-Leste, Guatemala, Palestine, and Uganda, the authors bring to life a key dimension of how both peace and states are built.

James K. Boyce is professor of economics at the University of Massachusetts, Amherst. **Madalene O'Donnell** is on the staff of the UN Department of Peacekeeping Operations.

Peace and the Public Purse: Economic Policies for Postwar Statebuilding

*James K. Boyce and
Madalene O'Donnell,*
editors

How do rule of law programs contribute to conflict management? What strategies best address the challenges to securing the rule of law in fragile countries? What place do rule of law policies have in efforts to achieve stable and equitable development?

The authors of *Civil War and the Rule of Law* address these fundamental questions, analyzing rule of law programs in the context of conflict prevention, peacekeeping, and peacebuilding activities. Throughout the book, they emphasize the critical relationship linking the rule of law, security, development, and human rights.

Agnès Hurwitz is in the Office of the President of the International Criminal Tribunal for the Former Yugoslavia. **Reyko Huang** is a doctoral candidate in political science at Columbia University.

Civil War and the Rule of Law: Security, Development, Human Rights

Agnès Hurwitz, with Reyko Huang, editors

Although policymakers and practitioners alike have enthusiastically embraced the idea that security and development are interdependent, the precise nature and implications of the dynamic interplay between the two phenomena have been far from clear. The authors of *Security and Development: Searching for Critical Connections* realistically assess the promise and shortcomings of integrated security-development policies as a strategy for conflict prevention. Addressing cross-cutting issues and also presenting detailed country case studies, they move beyond rhetoric and generalizations to make an important contribution to the international conflict prevention agenda.

Peacebuilding: A Field Guide

Luc Reychler and Thania Paffenholz, editors

“The editors masterfully bring together the knowledge and experience of over 50 scholars and practitioners.... This comprehensive volume could be very useful to practitioners as well as in the classroom.”

—CAROLYN SHAW,
JOURNAL OF CONFLICT STUDIES

A milestone in the search for sustainable peace, this handbook highlights the invaluable contributions of people working in the field. The authors clarify how fieldworkers “fit” in the overall peacebuilding process; provide details of the most effective practices; and offer guidelines for preparing for and working in the field.

Luc Reychler is professor of international relations and director of the Center for Peace Research and Strategic Studies at the University of Leuven. Thania Paffenholz is lecturer in peace and conflict studies and senior researcher at the Centre for Conflict, Development and Peacebuilding at the Graduate Institute of International and Development Studies in Geneva.

Peacebuilding in Postconflict Societies: Strategy and Process

Ho-Won Jeong

“Combines conceptual rigour, a wide-ranging understanding of the relevant academic literature and an impressive grasp of major contemporary peacebuilding cases.... A concise yet highly informative overview of this subject.”

—CHARLES O. LERCHE, JOURNAL OF PEACE RESEARCH

“Jeong’s rewarding framework for creating and analyzing postconflict peacebuilding strategies is illuminated by rich illustrations drawn from a wide range of recent efforts.... Penetrating insights are also provided on the complex challenges confronted by postconflict peacebuilders.”

—CHADWICK F. ALGER

This integrative discussion of the multiple dimensions of peacebuilding in postconflict societies offers a systematic approach to strategies and processes for long-term social, political, and economic transformation.

Ho-Won Jeong links short-term crisis-intervention efforts to a sustained process that encompasses the entire complex environment of a conflict. His broad analytic framework and wealth of concrete examples provide a sophisticated, yet accessible, guide to the many strands and interrelations in this critical arena of world politics.

Ho-Won Jeong is professor in the Institute for Conflict Analysis and Resolution, George Mason University.

“All chapters are rich in detail.... This volume contributes with important knowledge on democracy assistance.”

—HELGA MALMIN BINNINGSBØ, JOURNAL OF PEACE RESEARCH

“Through a series of frank, incisive country case studies, this valuable volume takes the measure of international democracy assistance in postconflict countries.”

—THOMAS CAROTHERS

Few would dispute the importance of donating funds and expertise to conflict-ridden societies—but such aid, however well meant, often fails to have the intended effect. This study critically evaluates international democratization assistance in postconflict societies to discern what has worked, what has not, and how aid programs can be designed to have a more positive impact.

The authors offer a unique recipient perspective as they explore three dimensions of democracy promotion: elections, free media, and human rights. Drawing on the experiences of Afghanistan, Cambodia, El Salvador, Ethiopia, Guatemala, Mozambique, Rwanda, Sierra Leone, and Uganda, they suggest concrete ways in which the international community can better foster democratization in the wake of conflict.

Ending Civil Wars: The Implementation of Peace Agreements

Stephen John Stedman, Donald Rothchild, and Elizabeth M. Cousens, editors

“An excellent book that cumulates and advances theory while it offers policy relevant findings and recommendations.... A remarkable publication.”

—THOMAS OHLSON, INTERNATIONAL STUDIES REVIEW

Ending Civil Wars is the most comprehensive, systematic study to date of the implementation of peace agreements—of what happens after the treaties are signed.

Stephen John Stedman is senior fellow at the Center for International Security and Cooperation, Stanford University. The late Donald Rothchild was professor of political science at the University of California, Davis. Elizabeth M. Cousens is chief of staff for the UN mission in Nepal.

Peacekeeping in Sierra Leone: The Story of UNAMSIL

Funmi Olonisakin

“Olonisakin sheds considerable light on the path back to peace in Sierra Leone.... The book [also] includes many of the key UN documents in a valuable appendix.”

—NICOLAS VAN DE WALLE, FOREIGN AFFAIRS

The first in a series of “inside” histories, *Peacekeeping in Sierra Leone* relates how a small country—one insignificant in the strategic considerations of the world powers—propelled the United Nations to center stage in a crisis that called its very authority into serious question; and how the UN mission in Sierra Leone was transformed from its nadir into what is now widely considered one of the most successful peacekeeping missions in UN history.

Funmi Olonisakin tells the story of this experience, highlighting the key moments, and the reasoning behind strategic decisions. She also captures UNAMSIL’s internal struggle as it fought to regain some honor after the May 2000 crisis, when the UN had to rely on the infamous Charles Taylor to broker the release of 500 peacekeeper hostages.

Olonisakin’s rich narrative not only illuminates the ins and outs of the UNAMSIL mission, but also reflects on its meaning for current and future peace operations in Africa and beyond.

Funmi Olonisakin is director of the Conflict, Security, and Development Group at King’s College London.

Enabling Peace in Guatemala: The Story of MINUGUA

William Stanley

William Stanley tells the absorbing story of the UN peace operation in Guatemala’s ten-year endeavor (1994–2004) to build conditions that would sustain a lasting peace in the country.

Unusual among UN peace efforts because of its largely civilian nature, its General Assembly mandate, and its heavy reliance on UN volunteers to staff field offices, the mission (MINUGUA) focused initially on human rights; beginning in 1997, however, its scope expanded to include verification of the full range of peace accords designed to end nearly four decades of civil war between the government and the revolutionary insurgency.

MINUGUA faced a challenging political context: the government that signed the peace accords proved unable or unwilling to implement them, and the progress of successive governments was modest at best. Left to do the heavy lifting politically, the mission also grappled with uncooperative political elites and persistent state corruption, organized crime, and social inequality. Stanley chronicles a series of strategic—and sometimes experimental—choices from the UN’s point of view and provides a cautionary tale about the limits of international benevolence.

William Stanley is associate professor of political science at the University of New Mexico.

“Anderlini is uniquely qualified to write about women, peace, and security.... This is an excellent book.”

—ELISABETH PORTER, INTERNATIONAL STUDIES REVIEW

“Offers a vivid, comprehensive, and compelling account of the day-to-day efforts of women peacebuilders and leaves the reader enlightened and enriched.”

—JULIEANNE PORTER, GENDER & DEVELOPMENT

“A must-read for anyone engaged in the study or practice of conflict resolution and peacebuilding who wants to know the full story.”

—DONNA RAMSEY-MARSHALL, INTERNATIONAL JOURNAL ON WORLD PEACE

How and why do women’s contributions matter in peace and security processes? Why should women’s activities in this sphere be explored separately from peacebuilding efforts in general? Decisively answering these questions, Sanam Anderlini offers a comprehensive, cross-regional analysis of women’s peacebuilding initiatives around the world.

Anderlini also traces the evolution of international policies in this arena and highlights the endemic problems that stunt progress. Her astute analysis, based on extensive research and field experience, demonstrates how gender sensitivity in programming can be a catalytic component in the complex task of building sustainable peace—and provides concrete examples of how to draw on women’s untapped potential.

Sanam Naraghi Anderlini is a research affiliate at the Center for International Studies, Massachusetts Institute of Technology.

Greater Than the Sum of Its Parts? Assessing "Whole of Government" Approaches to Fragile States

Stewart Patrick and Kaysie Brown

"Does an excellent job of reviewing how Western democracies are dealing with the challenge of fragile states.... It is one of the few [studies] that has the analytical rigor, depth of insight, and full understanding of the inter-departmental and interdisciplinary approaches needed to address the issues: a fine accomplishment full of needed candor and practical recommendations." —ANDREW NATSIOS

With fragile states representing both a core development challenge and a source of major threats to international security, the search for strategies to assist the recovery of failing and war-torn countries has been high on the agendas of donor countries. Stewart Patrick and Kaysie Brown candidly assess efforts to bring together diplomatic, defense, and development instruments—the so-called 3Ds of "whole of government strategies"—made by seven major donor countries: Australia, Canada, France, Germany, Sweden, the United Kingdom, and the United States.

Stewart Patrick is research fellow at the Center for Global Development in Washington, DC, and professorial lecturer at the Johns Hopkins School of Advanced International Studies. Kaysie Brown is program associate at the Center for Global Development.

Cowardly Lions: Missed Opportunities to Prevent Deadly Conflict and State Collapse

I. William Zartman

"As Zartman argues, 'analysis is always hortatory, serving as the basis for action, and exhortation should always be analytical, based on sound examination and reasoning.' This well-stated position is equally well carried out by Zartman—one of our discipline's lions, and never a cowardly one." —BRUCE W. JENTLESON, INTERNATIONAL STUDIES REVIEW

"[A] significant contribution to the literature on conflict management and resolution." —CHOICE

What would have happened had the "road not taken" been the chosen action in past conflict interventions? What can we learn from a close look at alternatives that were not selected? Drawing on six detailed case studies (the Balkans, Haiti, Lebanon, Liberia, Somalia, and Zaire/Congo), I. William Zartman identifies a series of missed opportunities—options that arguably would have provided feasible and better outcomes for the reduction of violent conflict and the prevention of state collapse.

Zartman specifies potential solutions within the entire trajectory of each conflict, considering in each instance why the indicated decisions were not taken. The principles and mechanisms that he develops in the course of his analysis have profound implications for the actions of the international community in preventing conflicts from escalating to violence, and for managing violent situations when they do occur.

I. William Zartman is Jacob Blaustein Professor of International Organization and Conflict Resolution at the School of Advanced International Studies, Johns Hopkins University.

"Important, impressive, thought-provoking and action-motivating. I recommend this with enthusiasm."

—MICHAEL J. LENAGHAN, INTERNATIONAL JOURNAL ON WORLD PEACE

Individuals can make a difference working for peace worldwide. That is the message of *People Building Peace II*, an inspiring collection of stories of how "ordinary" men and women have played a crucial part in conflict prevention and peacebuilding.

Thematic chapters, illustrated with compelling case studies, present new trends in the role of civil society in conflict transformation. The cases reflect the variety of activities initiated and sustained by a broad range of actors, including women's groups, youth groups, and faith-based organizations. Such topics as reconciliation, dialogue, networking, and traditional methods of conflict resolution are among the topics thoroughly explored, as are the successful initiatives of lesser-known NGOs.

People Building Peace II: Successful Stories of Civil Society

Paul van Tongeren, Malin Brenk, Marte Hellema, and Juliette Verhoeven, editors

“This is probably the most comprehensive work to date about the resource dimension of intrastate wars.”

—BJØRN MØLLER, *ECONOMICS OF PEACE AND SECURITY JOURNAL*

“To date the most ambitious—and successful—attempt to address the wide variety of tools available for policymakers to reduce the negative effects of natural resource endowments like diamonds, oil and timber.”

—HENRIK URDAL, *JOURNAL OF PEACE RESEARCH*

Providing both a means and a motive for armed conflict, the continued access of combatants in contemporary civil wars to lucrative natural resources has often served to counter the incentives for peace. *Profiting from Peace* offers the first comprehensive assessment of the practical strategies and tools that might be used effectively, by both international and state actors, to help reduce the illicit exploitation of natural resources and the related financial flows that sustain the violence.

—LAWRENCE D. FREEDMAN,
FOREIGN AFFAIRS

Aiding Peace? explores just how NGOs interact with conflict and peace dynamics, and with what results.

Jonathan Goodhand compares the programs of international and national NGOs in seven conflict arenas: Afghanistan, Armenia-Azerbaijan, Kyrgyzstan, Liberia, Moldova, Nepal, and Sri Lanka. Well grounded in an analysis of the political-economy context of each conflict, his important and perhaps unexpected results point to essential policy and practice changes in the interest of enhanced NGO peacebuilding efforts. Not least, they also highlight the need for a fundamental adjustment of expectations.

Jonathan Goodhand is lecturer in the Development Studies Department at the School of Oriental and African Studies, University of London.

Men, Militarism, and UN Peacekeeping: A Gendered Analysis

Sandra Whitworth

“Sandra Whitworth has written a compelling book... [This] is definitely a feminist look and critique of the current business of peace operations, but it is one that policy makers of all nations, and especially those in the United Nations, should consider.”

—DARLENE ISKRA,
ARMED FORCES & SOCIETY

“An important contribution to our understanding of peace operations.”

—PAUL WILLIAMS,
INTERNATIONAL AFFAIRS

Sandra Whitworth looks behind the rhetoric to investigate from a feminist perspective some of the realities of military intervention under the UN flag.

Whitworth contends that there is a fundamental contradiction between portrayals of peacekeeping as altruistic and benign and the militarized masculinity that underpins the group identity of soldiers. Examining evidence from Cambodia and Somalia, she argues that sexual and other crimes can be seen as expressions of a violent “hypermasculinity” that is congruent with militarized identities, but entirely incongruent with missions aimed at maintaining peace. She also asserts that recent efforts within the UN to address gender issues in peacekeeping operations have failed because they fail to challenge traditional understandings of militaries, conflict, and women.

This unsettling critique of UN operations, which also investigates the interplay between gender and racial stereotyping in peacekeeping, has the power to change conventional perceptions, with considerable policy implications.

Sandra Whitworth is professor of political science and women’s studies at York University.

“Timely and compelling.... Rigorous analysis, like that in this book, is showing that the traditional aid approaches have not worked, and that strong institutions and powerful and coordinated incentives are needed to change—no, to transform—embedded patterns.... [The authors] offer serious glimmers of hope that we may be arriving at an understanding of what is necessary to bring about that transformation.”

—LARRY DIAMOND

Despite hundreds of billions of dollars spent on foreign aid to sub-Saharan Africa, a sure path to growth and development has not yet been found—and each new heralded approach has crumbled amid regrets and recriminations. The authors of *Smart Aid for African Development* provide critical assessments of the main components of foreign assistance, considering how smarter use can be made of available resources to advance growth and democracy, rebuild war-torn societies, and reduce the crippling poverty that underlies many of the continent’s fierce conflicts.

Corruption and Development Aid: Confronting the Challenges

Georg Cremer

“An honest and revealing look at the cancer of corruption in the developing world. Examining the interrelated aspects of development aid, Dr. Cremer aptly presents the rampant abuse and misuse of aid funds and proposes sensible ways to address the issue. His book should be required reading for all those involved in development work.”

—STEVE BERKMAN

“Practical experience, administrative know-how, and last but not least, the author’s analytical skills all come together in this clear and concise book. It belongs in the hands of every individual interested in development policy.”

—THEODOR HANF

“An outstandingly well structured, clearly written, and practice-oriented overview of corruption in development work. Cremer shows how to handle the challenges.”

—CAREL MOHN

Although corruption has always been a quietly recognized aspect of development aid programs, the taboo against openly discussing it is only now being widely overcome. Georg Cremer systematically addresses the subject, exploring the nature and impact of corruption, the conditions under which it is most likely to take hold, and the strategies that can enable aid organizations, both NGOs and those in the state sector, to limit the risk.

Georg Cremer is secretary general of Caritas Germany and associate professor of economics at the University of Freiburg.

“An important contribution.... The book’s strength rests in its comprehensive multidimensional approach, and in particular its inclusion of theoretical, pragmatic, and empirical scholarship, to make sense of the multifaceted issue of child labor.”

—CLAIR APODACA, *H-NET REVIEWS*

The International Labour Organization estimated in 2000 that, of the approximately 246 million children engaged in labor worldwide, 171 million were working in situations harmful to their development. *Child Labor and Human Rights* provides a comprehensive overview of the phenomenon of child labor from a human rights perspective.

The authors consider the connections between human rights and abusive child labor, the pros and cons of a rights-based approach to the problem, and specific strategies for effecting change. They make an indispensable contribution to the growing effort to abolish abusive and exploitive child labor practices.

Four Generations of Nortesños: New Research from the Cradle of Mexican Migration

Wayne A. Cornelius, David Fitzgerald, and Scott Borger, editors

Drawing on decades of fieldwork in a high-emigration town in central Mexico, as well as a thousand recent interviews, the authors chart the town's evolution from a source of short-term contract laborers during World War II to a present-day exporter of undocumented and legal migrants. They investigate how people-smuggling operates, whether border enforcement affects decisions to migrate, and migration's impact on family, health, and the hometown economy. Their work sheds important new light on debates central to international migration studies.

Unilateralism and U.S. Foreign Policy: International Perspectives

David M. Malone and Yuen Foong Khong, editors

“The most inclusive and substantial volume yet published on the subject. No volume inspires more careful reading and critical thinking. Highly recommended.” —CHOICE

From the war on terrorism to global warming, from national missile defense to unilateral sanctions, the US has been taken to task for coming on too strong—or for doing too little. This important new book explores international reactions to US conduct in world affairs.

Authors from around the world address the tensions between unilateralism and multilateralism in US foreign policy. Their careful analysis suggests that the US inclination to go it alone may undermine not only long-term international support for US leadership, but also the sustainability of valuable international institutions.

The Age of War: The United States Confronts the World

Gabriel Kolko

“A provocative pedagogical source for the classroom.” —CHOICE

“An informed and comprehensive study of what may potentially occur in Professor Kolko’s prediction on the world’s current state and instability.... Impeccably researched and well authored ... The Age of War is very strongly recommended reading.”

—MIDWEST BOOK REVIEW

In this comprehensive, succinct—and provocative—overview of five decades of US foreign policy, Gabriel Kolko gives special emphasis to the period since 2000.

Kolko argues that, as dangerous as the Cold War era was, we face far more instability and unpredictability now; the international environment is qualitatively more precarious than ever. Ranging from the Vietnam War to the war in Iraq, he critically appraises US responses to a world of complex new challenges. The result is a book with a unique voice, one that is sure to stimulate classroom discussion, serving as a powerful pedagogical tool.

Gabriel Kolko is Distinguished Research Professor Emeritus at York University in Toronto.

Superpower on Crusade: The Bush Doctrine in US Foreign Policy

Mel Gurtov

“A carefully documented, important book.... The author makes his case convincingly without being shrill, referencing different perspectives.... Highly recommended.” —CHOICE

“From his work in the 1960s on the Pentagon Papers to this new book, Mel Gurtov has proven to be one of the most thoughtful and profound critics of US foreign policy. Superpower on Crusade, a study of global scope solidly supported with logic and evidence, examines both the roots of the Bush Doctrine and its self-defeating implications.”

—PETER VAN NESS

With its emphasis on unilateralism, preemptive attack, and regime change, US foreign policy under George W. Bush continued the longstanding US quest for primacy—but with some radical departures from previous approaches. Superpower on Crusade offers a critical exploration of the origins and implementation of the Bush Doctrine.

Gurtov first traces the sources of US missionary and expansionist tendencies and highlights their particular manifestations in the Bush administration. Then turning to the war on Iraq, he focuses on real vs. stated objectives, the Pentagon’s preeminence in shaping security policy, and the roles of Congress, the UN, and US allies. Subsequent chapters examine US policy with regard to such issues as nuclear proliferation, international law, development assistance, the environment, and human rights.

Assessing the costs of the Bush Doctrine at home and abroad, Superpower on Crusade presents a concise critique of US foreign policy intended to stimulate debate in the classroom, as well as among scholars.

Mel Gurtov is professor of political science and international studies at Portland State University.

Making China Policy: From Nixon to G.W. Bush

Jean A. Garrison

“An excellent book ... one of the most comprehensive and up-to-date studies of US-China relations that I have seen.” —SHIPING ZHENG

“Jean Garrison explores the complex negotiations and machinations that are too often overly simplified in books on US foreign policy. She provides an in-depth account of the political players involved: their goals, their motivations, and their actions.” —THOMAS DOLAN

What explains the twists and turns in US-China relations since Richard Nixon initiated a policy of engagement in the early 1970s? Addressing this question, Jean Garrison examines the politics behind US China policy across six administrations—from Nixon to George W. Bush.

Garrison finds that a focus on the internal decisionmaking process is key to understanding both continuity and change in more than three decades of US-China relations. Incorporating interactions at the levels of strategic context, presidential beliefs and leadership style, and bureaucratic politics, she constructs a comprehensive explanation of how China policy was formed in each administration. Her thorough—and engaging—account sheds new light on US foreign policy making in general, as well as on Washington’s China policy.

Jean A. Garrison is associate professor of political science at the University of Wyoming.

Drugs and Democracy in Latin America: The Impact of U.S. Policy

Coletta A. Youngers and Eileen Rosin, editors

“A well-researched project that cogently discusses the international and domestic contexts and provides a comprehensive and reasoned account of problems of the current U.S. drug policy.” —JENNIFER S. HOLMES, JOURNAL OF POLITICS

“This collection of program assessments and case studies is probing, informative, and deeply disturbing.” —RICHARD FEINBERG, FOREIGN AFFAIRS

The authors of *Drugs and Democracy in Latin America* offer a comprehensive review of US drug-control policies toward the region, assess the impact of those policies on democracy and human rights, and present eight detailed case studies.

Coletta A. Youngers and Eileen Rosin codirected the Drugs, Democracy, and Human Rights project at the Washington Office on Latin America (WOLA).

**2nd Edition
 Driven by Drugs: US Policy Toward Colombia**

Russell Crandall

“Crandall’s finely detailed and scrupulous account of the policymaking process over the last decade on such a significant foreign policy issue helps fill a major gap in the scholarly literature.... [His] judicious treatment nicely conveys just how personalized US Colombia policy has been.”

—MICHAEL SHIFTER, PERSPECTIVES ON POLITICS

“This excellent case study of US foreign policy is highly recommended at all levels.” —CHOICE

In the years since the first edition of *Driven by Drugs* was published, there have been dramatic changes in US policy toward Colombia, as well as in domestic Colombian politics. This new edition traces developments in both arenas, bringing the story current through the administrations of George W. Bush and Álvaro Uribe.

Russell Crandall is associate professor of political science at Davidson College.
