The United Nations: Policy and Practice

Jean E. Krasno, editor

“Historically rich, detailed, and practice focused... Provides an in-depth account of all the important issues that the UN is engaged in, as well as a discussion of how these emerged over time.” —**Matthias Hofferberth**,
University of Texas at San Antonio

“Unique in both its breadth and depth of coverage of the United Nations... An invaluable resource.” —**Rebecca McCumbers Flavin**, Baylor University

The United Nations has a vast outreach through its many agencies, funds, and programs—but that very fact can make it difficult for “outsiders” to understand. Among the questions that arise: How can the UN promote human rights when its charter prohibits its intervention in the domestic affairs of sovereign states? Why do the five permanent members of the Security Council have veto power? Can a dysfunctional Security Council be circumvented? How is consensus on policy ever reached? Where does the money to run this enormous system come from? The list goes on. In response, this new text clearly explains the UN’s history, functions, and day-to-day operations.

Ranging from development to disarmament, from electoral assistance to finance, the authors unveil the processes involved as diplomats and practitioners navigate the challenges of serving the common good while balancing opposing interests.

Jean E. Krasno is on the faculty of the Department of Political Science at the City College of New York and also a lecturer at Columbia University.

Redefining Development: The Extraordinary Genesis of the Sustainable Development Goals

Paula Caballero with Patti Londoño

“The authors vividly illustrate how a small group of actors punched far above their weight to deliver far-reaching outcomes, and they highlight how individuals and countries can step up ‘to fill the collective leadership gap.’ . . . [Their book] offers a valuable repertoire of lessons for better understanding the multifaceted dynamics of international diplomacy.”

—Simon Beaudoin, *International Affairs*

“This once-in-a-generation detailed insider’s look at how a critically important UN decision was made will be valuable to both scholars and students.”

—Craig Murphy, Wellesley College

“Bridging the worlds of academia and practice, Caballero and Londoño provide illuminative insights on the role of small countries in shaping the UN development agenda in the broader context of the informal processes of multi-lateral diplomacy.” —Jacques Fomerand, former director, UNU Office in North America

This extraordinary first-person story of what can be achieved through informal diplomacy traces the improbably successful struggle to achieve acceptance of the Sustainable Development Goals (SDGs)—and thus transform the global development agenda—against all odds.

Moving from the framing of the SDG concept through the entire negotiation process (including a trove of key documents), Paula Caballero and Patti Londoño’s vibrant narrative provides rare insight into informal diplomacy and multilateralism in action. Their insiders’ account provides a unique perspective on how global movements and agendas can be built and impelled forward. Not least, it also serves to prove that just a few committed individuals can generate radical change.

During the period covered in this book, **Paula Caballero** was director for economic, social, and environmental affairs and **Patti Londoño** was vice minister for multilateral affairs in the Colombian Ministry of Foreign Affairs.

NEW—2ND EDITION!

How the Aid Industry Works: The Politics and Practice of International Development

Arjan de Haan

Praise for the 1st edition:

“De Haan has a real talent for encapsulating large and complex topics in the span of a few pages and therefore manages to achieve near-comprehensive treatment within the covers of a modest-sized book.”

—*Development Policy Review*

“In a field dominated by one-sided pro- or anti-aid polemics, de Haan adds some much-needed substance by setting out the nuts and bolts of how aid actually works.... An invaluable introduction.” —Duncan Green, *Oxfam*

“A much welcome volume that goes beyond ‘whether’ aid works to help us understand ‘how’ the aid industry works.” —Sakiko Fukuda-Parr, *The New School University*

International development assistance—what Arjan de Haan calls the aid industry—continues to be critical for overcoming the world’s development challenges, perhaps more so than ever given the global realities of climate change and the Covid pandemic. But how does this industry actually work? What practices does it follow, and to what effect? De Haan addresses these questions, providing a concise introduction to the business of development.

This new edition reflects fifteen years of increasing complexity in the aid industry: heightened polarized debates about appropriate approaches; the involvement of new donors, such as China; adoption of the Sustainable Development Goals; the blending of public- and private-sector investment; tensions among charitable, political, and commercial considerations. The list goes on. De Haan incorporates these factors in a succinct overview that is an ideal introduction for students encountering the subject of development for the first time, as well as a handy overview for development practitioners.

Arjan de Haan is a senior program specialist at the International Development Research Centre (IDRC).

US Policy Toward Africa: Eight Decades of Realpolitik

Herman J. Cohen

“In a time when respectful political discussions are increasingly difficult, Cohen’s account gives an honest, if even unflattering, take on history.”

—Caleb Slayton, *The Bridge*

“[This] comprehensive political history of US-African relations carefully chronicles American policy on the continent across successive presidencies, from the administration of Franklin Roosevelt to that of Donald Trump.” —Nicolas van de Walle, *Foreign Affairs*

Herman Cohen draws on both the documentary record and his years of on-the-ground experience to provide a uniquely comprehensive survey and interpretation of nearly eight decades of US policy toward Africa.

Tracing how this policy has evolved across successive administrations since 1942 (beginning with President Franklin D. Roosevelt’s third term in office), Cohen illuminates the debates that have taken place at the highest levels of government; shows how policy toward Africa has been affected over the years by US relations with Europe, the Soviet Union, the Middle East, and most recently China; and points to the increasing reliance of Western economic interests on Africa’s natural resources. His deeply informed narrative reveals the roles not only of circumstance and ideology, but also of personalities, in the formulation and implementation of US foreign policy.

Herman J. Cohen was a member of the US Foreign Service for thirty-eight years, posted to embassies in France, the Democratic Republic of Congo, Uganda, Zambia, and Zimbabwe. He was US ambassador to Senegal and The Gambia and served as assistant secretary of state for Africa under President George H. W. Bush. Subsequently, he was senior adviser in the Africa region at the World Bank. He is now president of Cohen and Woods, an international consulting firm.

Making US Foreign Policy: The Essentials

Ralph G. Carter

“There are numerous US foreign policy textbooks on the market, but this one is my favorite. It tells you everything you need to know about the actors and factors [involved], in less than 300 pages! If you are interested in US foreign policy, do not look further ... get this book now.”

—Frédéric Gagnon, University of Quebec at Montreal

“A terrific overview of the key drivers, actors, processes, and outputs of US foreign policy. Carter distills a vast amount of knowledge into a highly readable text that is brought to life by numerous case studies and contemporary examples. His book will be an excellent foundational text for courses, and a valuable reference point for foreign policy scholars.” —Jordan Tama, American University

“The second edition is even better than its outstanding predecessor... Readers will find the clear, analytical exposition offered here to be the best available on the subject.” —Patrick James, University of Southern California

“Ralph Carter has achieved what I formerly considered impossible: an engaging and concise primer on US foreign policy that also serves as an introduction to foreign policy analysis and touches on the major schools of IR theory. I’m sure this text will become a standard.” —Valerie Hudson, Texas A&M University

Whether your approach to teaching US foreign policy is thematic, historical, case-study oriented, regional, or perhaps a blend of several approaches, *Making US Foreign Policy: The Essentials* is likely to be a text that you will want to assign as required reading.

The text focuses on the most fundamental questions: Who makes foreign policy decisions? How? What accounts for particular decisions? At the same time, discussions of current examples—responses to Russian interference in US elections, the travel ban targeting Muslim-majority countries, the Trump administration’s immigration policies, reactions to the murder of Saudi journalist and US resident Jamal Khashoggi, and many more—make the topic “real.”

Clear, concise, and reasonably priced, this is the book that will provide your students with a solid understanding of, and interest in, the process by which foreign policy is made in the current environment and the full range of actors involved.

Ralph G. Carter is Piper Professor of Texas and professor of political science at Texas Christian University.

US Politics and the United Nations: A Tale of Dysfunctional Dynamics

Alynn J. Lyon

“Lyon fills a critical void in our understanding of the US-UN relationship.”
—**Courtney B. Smith,**
Seton Hall University

It is no secret that the United States variously pulls away from the United Nations and embraces it as a significant venue for policy initiatives. But what explains this dramatic inconsistency? What is the logic of US multilateralism? Alynn Lyon explores the puzzling waxing and waning of US support for the UN, tracing events, actions, and decisions from the end of World War I to the present.

Lyon weaves together a consideration of international context, UN institutional dynamics, and US domestic politics to conceptualize and explain the trials and tribulations of the US-UN relationship. In the process, she tells the story of the progression of the US from a country committed to internationalism to one full of dysfunctional partisanship, ideological underpinnings, and domestic power struggles that undermine its capacities to cooperate on a global scale.

Alynn J. Lyon is professor of political science at the University of New Hampshire.

US National Security: Policymakers, Processes, and Politics

John Allen Williams, Stephen J. Cimbala, and Sam C. Sarkesian

“Accessible, well-organized, and deeply knowledgeable.... Updated to include the Biden Administration, this excellent introduction to national security policy-making shows clearly the interaction of, and tensions between, domestic and international politics, interests and values, and formal and informal institutions of governance.” —**Russell Burgos,** National Defense University

“Takes us through the process and the institutions briefly, clearly, logically.... a most thoughtful and enlightening presentation.” —**International Affairs**

“Well organized, probing, instructive, and multidimensional in perspective.”

—**Perspectives on Political Science**

The main focus of US national security policy has shifted dramatically since the years of the Obama administration, moving away from nation building and counterinsurgency efforts and toward preparing for traditional state-on-state conflict with powerful peers. The sixth edition of *US National Security* reflects that change. It also addresses such current issues as the impact of an increasingly partisan political process, sharp divisions in public opinion, the ongoing challenges of homeland security, and developments in cyberspace and other possible domains of future warfare.

Retaining the successful structure and approach of the previous editions, the book clearly introduces and explores the full range of actors, processes, and politics involved in maintaining US national security.

John Allen Williams is professor emeritus of political science at Loyola University Chicago. **Stephen J. Cimbala** is Distinguished Professor of Political Science at Penn State Brandywine. The late **Sam C. Sarkesian** was professor emeritus of political science at Loyola University Chicago.

7TH EDITION

Introducing Global Issues

Michael T. Snarr and D. Neil Snarr, editors

Praise for the previous editions:

“Since I began assigning *Introducing Global Issues*, my students have been much more involved in the course.... A valuable resource.” —**Jeffrey P. Blick**, Georgia College and State University

“A balanced, in-depth introduction to the intertwined nature of modern global issues.” —**Ralph G. Carter**, Texas Christian University

The half-decade since the 6th edition of *Introducing Global Issues* appeared has seen enormous changes in the international arena, perhaps most notably a move away from multilateral approaches to solving global problems—climate change, the covid pandemic, conflict-driven migration, and more. Both the impact of those changes and possible paths to collaborative problem solving are at the center of this new, fully revised and updated edition of the text.

The material has been successfully designed for readers with little or no prior knowledge of the topics covered. Each chapter provides an analytical overview of the issue addressed, identifies central actors and perspectives, and outlines past progress and future prospects. Discussion questions are posed to enhance students’ appreciation of the complexities involved, and suggestions for further reading additionally enrich the text.

Michael T. Snarr is professor of political science at Wilmington College. **D. Neil Snarr** is professor emeritus of sociology at Wilmington College.

Pandemic Medicine: Why the Global Innovation System Is Broken, and How We Can Fix It

Kathryn C. Iбата-Arens

“Presents a powerful critique of our current system of biomedical innovation dominated by the aggressive pursuit of intellectual property. Drawing on rich case studies from China, India, and Japan, Iбата-Arens shows that government can foster the creation of an innovative commons, sandboxes in which private and public actors can collaborate to create needed innovations.”

—Steve Casper, Keck Graduate Institute

“A fascinating and enlightening book that resonates singularly with the current pandemic, and also with the environmental crisis.” —Etienne Nouguez, Sciences Po Paris

“Iбата-Arens’s accessibly written, and timely, book offers a compelling argument.”

—Anthony P. D’Costa, The University of Alabama in Huntsville

Despite a century of advances in modern medicine, as well as the rapid development of Covid vaccines, the global pharmaceutical industry has largely failed to bring to market drugs that actually cure disease. Why? And looking further ... How can government policies stimulate investment in the development of curative drugs? Is there an untapped potential for “natural medicines” in new drug discovery? How have private–public sector partnerships transformed the ways we innovate? To what extent are medicinal plant biodiversity and human health codependent?

Addressing this range of increasingly critical questions, Kathryn Iбата-Arens analyzes the rise and decline of the global innovation system for new drug development and proposes a policy framework for fast-tracking the implementation of new discoveries and preparing for future pandemics.

Kathryn C. Iбата-Arens is Vincent de Paul Professor of Political Economy at DePaul University.

Religion and Politics on the World Stage: An IR Approach

Lynda K. Barrow

The premise of this new text is straightforward: Religion matters in world politics. Therefore, to comprehend the world around us, we need to understand how and why religion matters, analyze the interaction in a systematic way, and have a framework in which to fit facts and events that we cannot yet anticipate. The goal of *Religion and Politics on the World Stage* is to provide the information and tools necessary to accomplish those tasks.

Designed with undergraduate students in mind, the book:

- Explains theories, trends, assumptions, and situations in an accessible way.
- Consistently applies an international relations framework.
- Presents individual, state, and global levels of analysis.

The vignettes that open each chapter, depicting key aspects of the nexus between religion and world politics, quickly engage readers and serve as compelling entryways into discussions of broader issues.

Lynda K. Barrow is professor of political science at Coe College.

Making Sense of International Relations Theory

Jennifer Sterling-Folker, editor

Praise for the 1st edition:

“[A] masterful discussion and application of the major theoretical approaches in international relations.... A wide range of readers will profit from this well written, concise, and serious volume.”—Steven E. Lobell, *International Studies Review*

“A highly inventive textbook that showcases leading theoretical approaches to IR.... [It] will help students of IR to see the value of theory and to appreciate the very significant differences among and within these approaches.”

—Amy E. Eckert, *Millennium*

With the 2003 invasion of Iraq by the US and its allies as a common point of reference, *Making Sense of International Relations Theory* illustrates theories in action.

Each contributor presents a particular framework for interpreting world affairs. This structure offers students tangible examples of how theory is used in practice and at the same time highlights the explanatory differences among theories. Incorporating extensive introductory sections, the book is uniquely designed to explore alternative ways of understanding current events—to assist students in making sense of, as well as with, IR theory.

Jennifer Sterling-Folker is professor of political science at the University of Connecticut.

Stephen A. Kocs

“In this illuminating history, Kocs traces how international order has risen and fallen over the centuries.”

—G. John Ikenberry, *Foreign Affairs*

Where does international order come from? How is it established and maintained? Why does it break down? With every sovereign state its own master, how can order prevail?

Answering these questions in a briskly paced, systematic survey, Stephen Kocs explores the rise and fall of successive international systems across the centuries—from the dynastic institutions of Renaissance Europe, to the power-politics systems of eighteenth- and nineteenth-century Europe, to the liberal international systems of the contemporary world.

Human Rights in International Politics: An Introduction

Franke Wilmer

This comprehensive introduction to the study of human rights in international politics blends concrete developments with theoretical inquiry, illuminating both in the process.

Franke Wilmer presents the nuts and bolts of human rights concepts, actors, and implementation before grappling with issues ranging from war and genocide to social and economic needs to racial and religious discrimination. Two themes—the tension between values and interests, and the role of the state as both a protector of human rights and a perpetrator of human rights violations—are reflected throughout the text. The result is a clear, accessible exposition of the evolution of international human rights, as well as the challenges that those rights pose, in the context of the state system.

Franke Wilmer is professor emerita of political science and international relations at Montana State University.

Even as human rights provide the most widely shared moral language of our time, they also spark highly contested debates among scholars and policy-makers. When should states protect human rights? Does the global war on terror necessitate the violation of some rights? Are food, housing, and health care valid human rights? *Debating Human Rights* introduces the theory and practice of international human rights by examining fourteen controversies in the field.

Daniel Chong presents the major arguments on both sides of each debate, encouraging readers to think critically and form their own opinions. Designed for classroom use, the structure of the book makes it easy for students to become familiar with the major political and legal actors in the global human rights system and to understand the practical challenges of protecting civil, political, social, and economic rights.

Daniel P.L. Chong is professor of political science at Rollins College.
